# **Attention Referring Physicians**

Aventa is a residential addiction treatment facility for women. Clients attend for a minimum of 6 weeks of treatment. We require that the medical form attached be completed prior to treatment **preferably by the Client's primary care physician.** 

Please complete the form with as much detail as possible including **all prescribed and over the counter medications** that you are recommending your client take while in treatment.

#### Medical checklist:

- All medications must be listed and approved by the physician prior to treatment. If there are any changes prior to coming into treatment a new form must be completed or an amendment made to the initial form and signed by the original MD.
- We require clients to be stabilized on their medications when they begin treatment. We request that any necessary adjustments are made 2-4 weeks prior to treatment.
- Please review the restricted medications list (attached).
- All medications must be in their original packaging. Medications should not be blister-packed with the exception of Seroquel.

Feel free to contact us at 403-245-9050 with any questions or concerns.

Thank you for your time and support.

Sincerely,

#### **OVERDOSE - Reduce Your Risk**

Fentanyl may be 100 times more toxic than morphine, heroin, or oxycodone. Even small amounts can result in overdose and it can be found in other drugs without you knowing.

If you're going to use:

- don't use fentanyl, or any other drug, while alone;
- start using in small amounts;
- do 'test shots' (or test doses);
- don't mix drugs;
- avoid speedballing;
- always carry a Naloxone Kit;
- call 911 if you or someone suspects a person is experiencing an overdose.
   Calling for help can save a life!
