## Service Contract and Consent to Services for Phase II / YAT

### Service philosophy:

- Incorporating curriculum materials by Dr. Stephanie Covington, Aventa provides concurrent capable, trauma informed, gender responsive addiction treatment programs to meet the unique needs of women.
- Aventa is primarily abstinence-based.
- Cigarettes are restricted but not prohibited. Cigars, loose tobacco, e-cigarettes/vapes are not permitted.
- Women on Methadone, Kadian or Suboxone treatment for opioid dependence are eligible to attend our programs.

### Assessment for Treatment

- The program is a collaboration between Alberta Health Services (AHS) and Aventa. Clients must be referred by an AHS Addictions and Mental Health Counsellor via an AHS Addictions Services Office in their community. Clients cannot self-refer to this program. **(YAT Program only)**.
- Assessment for treatment is completed based on the submitted application form, medical form and assessment interview. Clients are required to adhere to the restricted medication list.
- If the Client or the Counsellor determine that the treatment program at Aventa is not appropriate, alternative community services will be discussed.

### Description of Services:

- **Phase II** is a six week intensive live-in program that provides individual case management and group counselling based on the Helping Women Recover Curriculum developed by Dr. Stephanie Covington. This program focuses on the following four key areas: self, relationships, sexuality and spirituality. Please see our agency brochure for further information.
- **Young Adult Treatment (YAT)** is a three month live-in program for women 18-24 years of age. It includes individual and group counselling, a life skills and recreation component, and a Family Counsellor for individual and family sessions. YAT is based on the Helping Women Recover Curriculum developed by Dr. Stephanie Covington. This program focuses on the following four key areas: self, relationships, sexuality and spirituality. Please see our agency brochure for further information.
- Programming consists of individual case management, and intensive group therapy. Most, if not all, therapy is based on process groups.
- Groups typically consist of 8-12 women who are admitted to treatment during a window of admission of a few days, and then the group becomes closed. Admissions in YAT are ongoing, so groups are open to new Clients throughout treatment.
- Larger group sessions or activities will also occur with other Clients attending the Aventa live-in programs.
- Clients attend Peer Recovery groups onsite, and online and in the surrounding community. The types of groups depend on availability and Clients are able to choose from a list of available groups.
- The live-in component also offers opportunities to practice skills learned/ discussed in groups.

### Likely benefits and risks:

- Through the Aventa treatment program, Clients will likely experience noticeable progress towards meeting their goals. Clients will also likely have a better understanding of themselves and their needs.

- In the end, we believe the benefits of positive changes in participating in the Aventa treatment program outweigh these negative experiences.

### **Meals:**

- Three nutritious meals and snacks are provided daily.
- Lunch and dinner include a main course as well as a salad bar.
- Vending machines with snacks are available. Clients have access to a locker for storage of snacks.
- If Clients have any food allergies or dietary concerns, please ensure the Assessments and Admissions Counsellor is aware of this prior to beginning treatment and also on admission day. ***Nuts and other allergens are used on site, therefore cross contamination may occur.***

## OVERDOSE - Reduce Your Risk

Fentanyl may be 100 times more toxic than morphine, heroin, oxycodone. Even small amounts can result in overdose and it can found in other drugs without you knowing.

If you're going to use:

- don't use fentanyl, or any other drug, while alone
- start using in small amounts
- do 'test shots' (or test doses);
- don't mix drugs
- avoid speedballing
- always carry a Naloxone Kit
- call 9-1-1 if you or someone suspects a person is experiencing an overdose. **Calling for help can save a life!**
